The New Treatment Fund
Medicines Recommended by NICE and AWMSG
Health Board Formulary Status
(From 01 April 2024 to 31 March 2025)

BACKGROUND

The Welsh Government launched the New Treatment Fund in January 2017. The New Treatment Fund requires the seven health boards and one NHS trust to make recommended medicines available as soon as is reasonably practicable, and certainly within 60 calendar days of the publication of the decision. Commencement of the 60 days is the date known as the 'NTF start date'. For National Institute for Health and Care Excellence (NICE) recommendations, a medicine should be available no later than 60 calendar days after the first publication of the Final Appraisal Determination (FAD)/Final Draft Guideline (FDG), or the Final Evaluation Determination (FED) for Highly Specialised Technologies (HSTs). For All Wales Medicines Strategy Group (AWMSG) recommendations, a medicine should be available no later than 60 calendar days after ratification of the recommendation by the Welsh Government. Occasionally the start of the 60-day timescale may be delayed. In such circumstances the 'NTF start date' aligns with the date that the delaying reason has been resolved. NICE and AWMSG may recommend an entirely new medicine, or a new use of an existing medicine to treat a different condition, for routine use in the NHS. Although recommended medicines should be made available within 60 days of recommendation, the sooner they are available, the sooner they can be prescribed where clinically appropriate.

In April 2017 the Welsh Government issued revised directions for health boards and NHS trusts, with an accompanying Welsh Health Circular, The New Treatment Fund – Access to medicines recommended by NICE and AWMSG (WHC [2017] 001). From May 2024 these directions are further revised to enable the granting, in specific circumstances, of an extension to the standard 60-day timescale. This is detailed at:- <https://www.gov.wales/directions-new-treatment-fund-exemptions>.

A formulary is an official list of medicines which may be prescribed within the health board or NHS trust to treat patients. Until a medicine is added to the formulary, prescribers may not be aware that it is available for use. Velindre University NHS Trust treats certain types of cancers only; the report therefore only takes account of those medicines clinically appropriate for inclusion on the trust formulary.

This document reports on the formulary status of medicines recommended for use within NHS Wales by NICE and AWMSG. All medicines listed in this report were recommended over a 12-month period, commencing at least 14 months prior to the publication of this report. This is to account for the generally applicable 60-day period available to health boards and NHS trust to add these medicines to their formularies. Where an extended timescale has been authorised the data reporting system has been adapted to accommodate the variations.

SOURCE OF INFORMATION

This report has been compiled through an analysis of health board and trust submitted data to the All Wales Therapeutics and Toxicology Centre (AWTTC).

In exceptional circumstances some medicines data have been removed from this report in light of specific factors outside the control of health boards and NHS trust.
