

Atorvastatin/ezetimibe (Atozet[®]) film-coated tablet

Merck Sharp & Dohme Ltd

September 2015

Statement of Advice

This product is currently not marketed in the UK.

In the absence of a submission from the holder of the marketing authorisation, atorvastatin/ezetimibe (Atozet[®]) cannot be endorsed for use within NHS Wales as adjunctive therapy to diet for use in adults with primary (heterozygous familial and non-familial) hypercholesterolaemia or mixed hyperlipidaemia where use of a combination product is appropriate in patients not appropriately controlled with a statin alone or in patients already treated with a statin and ezetimibe; and, as adjunctive therapy to diet for use in adults with homozygous familial hypercholesterolaemia (HoFH).

Advice context:

The All Wales Medicines Strategy Group (AWMSG) takes into account the National Institute for Health and Care Excellence (NICE) future work programme when considering whether a product will be appraised. To avoid duplication of effort, AWMSG would not normally consider undertaking an appraisal if NICE intends to publish final technology appraisal advice (STA/MTA/HST) for the same product and indication(s) within 12 months of the date of marketing authorisation. AWMSG advice is interim to that of NICE, should NICE subsequently publish guidance.

The above medicine cannot be endorsed for use within NHS Wales as a technology appraisal by NICE or AWMSG has not been undertaken. The medicine should NOT be prescribed routinely within NHS Wales for the indication stated above.

In the absence of guidance issued by NICE or AWMSG, clinicians should continue to exercise their clinical judgement when providing care for an individual patient. This should be in consultation with the patient and/or guardian or carer, based on the best available evidence.

This statement will be removed on receipt of a submission (i.e. the full submission [Forms A and B] or limited submission [Forms A and C]) or when final technology appraisal advice from NICE becomes available.
