Why should I report?

Your Yellow Card reports are vital in helping the **MHRA to monitor the safety** of all medicines and vaccines. Reports of suspected adverse drug reactions (ADRs) can be made for all medicines including vaccines¹.

What should I report?

Report all suspected adverse drug reactions that are:

- **Serious, medically significant or result in harm.** Serious events are fatal, life-threatening, a congenital abnormality, disabling or incapacitating, or resulting in hospitalisation.
- **Associated with newer drugs and vaccines (▼);** the most up-to-date list of black triangle medicines is available at: www.mhra.gov.uk/blacktriangle

If in doubt whether to report a suspected adverse drug reaction, please complete a Yellow Card.

How should I report?

It's quick and easy to report a Yellow Card:

- **Online:** www.mhra.gov.uk/yellowcard
- Using the free **Yellow Card app.**
- **Emailing:** yellowcard@mhra.gov.uk
- Through some **clinical systems.**

You can also access and interact with Yellow Card data and suspected **reactions reported** via the **Drug Analysis Profiles** tab on the website: ww.yellowcard.mhra.gov.uk/iDAP/²
